

THE PRIME MINISTER

**THE SOCIALIST REPUBLIC OF VIET
NAM**

Independence – Freedom - Happiness

N⁰: /QĐ-TTg

Hanoi, date month Year 2011

DECISION

On approval of the Program on „Reducing Emissions from Deforestation and Forest Degradation, Conservation of Forest Carbon Stocks, Sustainable Management of Forests, and Enhancing Forest Carbon Stocks”, period 2011-2020

THE PRIME MINISTER

Pursuant to the Government Organization Law, dated December 25, 2001;

Pursuant to the Land Law, dated November 26, 2003;

Pursuant to the Forest Protection and Development Law, dated December 03, 2004;

Pursuant to the Protection Environmental Law, dated November 29, 2005;

Pursuant to international requirements and agreements at the 13th, 15th, and 16th Conference of Parties (COP) under United Nations Framework Convention on Climate Change (UNFCCC);

Upon the proposal of the Minister of Agricultural and Rural Development in Official Letter N⁰...../TTr – BNN-TCLN, dated..... 2011,

DECIDES:

Article 1. Approve the Programme on Reducing Greenhouse Gas Emissions (hereafter as Programme on Reducing Emissions) from Deforestation and Forest Degradation; Conservation of Forest carbon stocks; Sustainable management of forests; and Enhancement of Forest carbon stocks (hereafter as REDD+), period 2011 – 2010 in Viet Nam.

**I. OBJECTIVES, GUIDING PRINCIPLES AND SCOPE OF THE
NATIONAL REDD+ PROGRAMME (NRP)**

1. Objectives

1.1. General Objective of the NRP

The National REDD+ Program (NRP) will contribute to reducing emissions from deforestation and forest degradation (REDD), enhancing forest carbon stocks, biodiversity conservation, and at the same time reducing poverty, protecting environment and promoting sustainable development in Viet Nam.

1.2. Specific Objectives

a) Period 2011 – 2015

- To prepare conditions for REDD+ readiness in Viet Nam through capacity building and institutions development at both central and local level;
- To contribute reducing emissions from deforestation and forest degradation, enhancing forest carbon stocks, conservation of carbon sinks and sustainable forest management where demonstration activities deployed.
- To implement result-based payment and payment for performance in pilot provinces.

b) Period 2016 – 2020

- To reduce emissions from deforestation and forest degradation, enhancing forest carbon stocks through forest conservation, reforestation, and sustainable forest management throughout the country.
- To implement result-based payment throughout the country.
- To contribute improving livelihood for local people in pilot provinces; effectively and sustainably managing, exploiting, using biology resources; protecting environment, limiting impact of climate change.

2. Guiding Principles in Development and Implementation

a) In accordance with national policies and laws, international treaties and agreements Viet Nam has signed or acceded to;

b) The NRP implementation requires the comprehensive, phase-coherent and focused measurements; transparent operational mechanism and comply with modern operational management standards;

c) Activities under NRP must be publicly and democratically decided, ensuring the fairness and equality, respecting interests and rights of stakeholders, improving sustainable livelihood, respecting local tradition and custom; improving gender equality;

d) Mainstreaming NRP into local and sector plans, policies towards their goals and benefits balance.

3. Duration and Scope of the NRP

a) Duration:

Period I: 2011 – 2015;

Phase II: 2016 – 2020.

b) Scope of the NRP:

The REDD+ Program covers all forestry provinces and provinces related to forestry in Viet Nam.

II. CONTENT OF THE NRP

1. Period 2011 – 2015

1.1. Capacity building and development of institutional management related to REDD+ in Viet Nam

a) Objectives:

To ensure capacity in structure operation and management of REDD+ programme at central and local level.

b) Contents:

- Organize workshops, awareness-raising events, trainings for central and local staffs participating in REDD+ Programme;
- Support for the institution development and revision for national management agencies to comply with REDD+ requirements
- Identify pilot provinces for REDD+, revise and complete policies and mechanism for REDD+ operation in Viet Nam.

1.2. Development of national Reference Emission Levels (REL) / Reference Levels (RLs)

1.2.1. Objectives:

To develop national reference emission levels (RELs) and/or reference levels (RLs) for the eligible activities under the REDD+ mechanism

1.2.2. Contents:

- a) Collect, review, and assess the data quality for the development of RELs/RLs;
- b) Develop national RELs/RLs for the eligible activities under the REDD+ mechanism if and when required under the UNFCCC
- c) Develop RELs/RLs at pilot provinces.

1.3. Establishment of national Monitoring, Reporting and Verification system (MRV)

1.3.1. Objectives:

National MRV system established and operated for the REDD+ implementation.

1.3.2. Principles for the development and implementation:

- a) MRV system must follow guidance from the Intergovernmental Panel on Climate Change (IPCC), and support for the implementation of UNFCCC;
- b) MRV must comply with national conditions, use available capacity and information; ensure the effectiveness and multi-objectives; the development and implementation must be in stages with the participation of stakeholders;
- c) To mobilize stakeholder management structures, set up new institution if necessary;
- d) To perform all aspects of MRV system with the support of international organizations on technical capacity building and institutional development;
- e) To ensure the reporting at provincial and national level on emission in four times a year and updating twice a year;
- g) Only the Government of Viet Nam has full responsibility on national MRV system.

1.3.3. Contents:

- a) To establish a transparent and effective national forest MRV system for REDD+, including:
 - Comprehensive national MRV and data management system to comply with the MRV commitments under the UNFCCC focuses on action data on emission and replacement, BDS and REDD+ implementation. Those activities must be linked and mutual supportive;
 - National MRV system will be supported to provide information needed by: i) Forest Land Management System (FLMS); ii) National Forest Inventory (NFI); iii) Green house Gas Inventory (GHGI);
 - The integration of provincial MRV system into national MRV system.
- b) To perform emission and replacement MRV system in pilot provinces.
- c) To report on emission and replacement under REDD+ and UNFCCC requirements.
- d) To verify emission and replacement.
 - GoV will set verification procedures to ensure reporting on emission reduction and replacement in comply with UNFCCC criteria.
 - Verify emission reduction and replacement in pilot provinces.

1.4. REDD+ Finance Management

1.4.1. Establishment and Management of National REDD+ Fund:

1.4.1.1. Purpose of the establishment:

- a) To mobilize all resources of society, national and international, to reach objectives of REDD+ Programme;
- b) To coordinate with stakeholder providing funding for REDD+ Fund, identify specific funding of donors, receive funding for REDD+ Fund, perform the

disbursement based on projects/programmes approved by REDD+ Fund Management Council;

c) To support Ministry of Agriculture and Rural Development (MARD) and Provincial People's Committee (PPC) monitoring the disbursement of projects/programmes comply with national and REDD+ Global regulations.

1.4.1.2. Operational principles of REDD+ Fund:

a) National REDD+ Fund is a trust fund, independent from national state revenues. The Fund is not used for any purpose outside REDD+. The disbursement of REDD+ Fund must follow objectives, subjects, and regulations of REDD+ Global;

b) REDD+ Fund is for social and environmental purposes, contributes to encouraging people to protect forest and environment. REDD+ Fund is not for benefit purpose;

c) REDD+ Fund ensures the transparency, efficiency, effectiveness, right purpose and complies with national law and international agreements.

1.4.1.3. REDD+ Fund revenues:

a) Bilateral and multilateral aid from countries, international organizations;

b) Trust contributions to REDD+ Fund from countries and international organizations;

c) Revenues from carbon credit trading from REDD+ on international market

1.4.1.4. Organizational structure of REDD+ Fund:

a) To establish National REDD+ Fund Office (hereafter as Central Fund) under National Forest Protection Development Fund. MARD decides to establish and administers the Fund.

b) Central Fund Office has its own management and operation system, including Fund Management Council with representatives from international partners, civil society organizations (hereafter as Council). Control Board and Operation system of National Forest Protection Development Fund are both used to perform activities for REDD+ Fund.

c) The establishment of the Council is decided by Minister of MARD, participants are from REDD+ international partners and national civil society organizations.

d) Assign MARD leading and coordinating with Ministry of National Resource and Environment (MONRE) and related ministries, agencies issuing Regulation on organizational structure and functions, tasks of Fund Management and Operation system. Financial mechanism for management and using Fund account is accordance with regulations at GoV Decree 99/2010/ND-CP dated 24 September 2010 on payments for forest environmental services, and international treaties, agreements related to REDD+

e) Assign PPC setting regulations structure and disbursement, financial mechanism for management and using REDD+ Fund account under Provincial Forest Protection Development Fund comply with regulations at Decree 99/2010/ND-CP and international treaties, agreements related to REDD+

f) Assign PPC consider establishing District REDD+ Fund in forest provinces.

1.4.2. Distribution and payment of REDD+ Fund according to Benefit Distribution System (BDS)

1.4.2.1. Principles of BDS:

- Timeliness: the payment must be made from initial activities; the frequency of payment must be more frequent (paid annually) than the frequency of monitoring and verification under MRV system (regular performance)
- Symmetrisation: the eventually direct and indirect payment rate must be accordance with cost provided to sustain REDD+ activities
- Equity: to ensure payment rate for beneficiaries accordance with their efforts to implement REDD+ which taking into account the difference of natural, social and economy conditions.
- Flexibility: the payment must be based on the actual situation of each locality participating in REDD + activities. Therefore, BDS must satisfy requirements on the diversity of participation and decision decentralization for local REDD+ Fund+;
- Effectiveness: REDD+ Fund management costs must be saved and monitored in order to maximize financial resource to pay for final beneficiaries
- Efficiency: Process and procedures for BDS implementation must ensure time-saving and cost saving to maximize financial resource for direct and indirect payment, contributing to strengthen Programme outcomes
- Transparency: decisions in BDS operation must comply with unique rules and standards, ensure the rapidity, transparency, verifiable with the participation of civil society organizations
- Compliance: BDS must be institutionalized into legal regulations with enforcement sanctions.

III. POLICIES AND MEASURES (PAM) PERIOD 2011-2015

1. Complete legal framework related to activities within REDD+ mechanism

1.1. Complete legal framework related to land, forest resources management

a) Complete regulations on general land use planning, including forest land use regulations as the basis for determining stable national forest territory and forest area for REDD+ Programme;

b) Complete legal framework related to institutionalization of land use, land use rights of forest owners that are organizations, households, individuals, communities, serving as the basis for receiving REDD+ payments;

c) Complete the mechanism, policies for stable and long-term forest land allocation by state agencies to households, individuals and village communities.

1.2. Complete legal framework related to financing

a) Study, develop legal framework on financial mechanism for management of REDD+ revenues, including benefits distribution system (BDS) for REDD+;

b) Study, complete mechanism, policies for encouraging investment from private sector and international investment into forest protection and development;

c) Study, amend, complete some forestry specific mechanisms, policies, such as forest resources tariffs; public-private joint venture on forest plantation, forest products processing...

1.3. Complete legal framework related to technical management of REDD+ Programme

a) Complete processes, technical procedures on forest plantation, zoning for rehabilitation, improvement, tending and enrichment of forest, prevent pests, prevent and combat forest fire;

b) Complete technical processes, procedures, measures for inspection, evaluation, monitoring forest resources for collecting required data for calculation of reduced emissions from REDD+;

c) Study, develop standards, measures for monitoring and verification of REDD+ results within consideration of national capacity, Intergovernmental Panel on Climate Change (IPCC);

1.4. Complete legal framework related to enforcement of law on forestry and trade of forest products

a) Complete legal framework related to sustainable forest management, ensure legality of timber and timber products: develop national standards system on sustainable forest management (FSC FM), chain of custody (FSC CoC); complete regulations on a system for ensuring legality of timber, in compliance with international practices; complete certification procedures for exporting timber and non-timber forest products;

b) Complete policies for encouraging organisations, households, individuals in investments for construction of processing plants for plantation forest timber and produce export products from plantation forest timber and non-timber products;

c) Complete penalty actions for illegal timber harvesting, trading of timber and timber products;

1.5. Research, develop investment mechanism and policies for forest carbon market, exchange, trading of forest carbon credit

2. Main measures

2.1. Set of measures for reducing deforestation and forest degradation

a) Checking, planning of stable land used for agriculture, forestry, aquaculture and other related land uses:

- Checking on forest land, planning and zoning of forest area and forest land for REDD+ Programme;

- Checking of land, planning of land use for agriculture, aquaculture and other related land.

b) Forest allocation, leasing:

- Province People's committees in provinces with forest organize the checking of forest allocation, leasing, to ensure all forest areas in the localities have specified entities in charge, integrating forest allocation, leasing with land allocation, leasing and issuing of land use rights certifications;

- Forest areas managed inefficiently by commune people's committees and state entities (Forest management boards, forest companies) or unused forest areas must be allocated or leased to households, organizations, individuals, communities, private enterprises, with priority for communities in areas that need and be able for protection.

c) Increase monitoring of enforcement of forest protection and development law and forest product trade, contribute towards reducing forest degradation:

- Apply reduced impact logging(RIL);

- Develop administrative and technical systems for monitoring of harvesting activities, identify timber origin; ensure legality in harvesting (for all types of natural and plantation forests), transport, processing and exporting; ensure legality of import timber;

- Develop public-private cooperation models; joint venture, affiliation between enterprises and households in developing material sources for forest products processing industry;

- Strengthen organizational structure of national forest protection, reasonably increase staffing of forest protection units at commune level, mobile forest ranger and forest fire prevention, combat, ensure total staffing nationally averages at 1 forest protector per 1,000 ha of forest, adding over 3,000 forest rangers by 2015.

Ensure communes with forest have local forest rangers, providing advice to commune people's committees in comprehensive implementation of forestry activities;

- Increase forest protection in communities, forest companies, forest management boards (where there is no Forest Protection Unit); Increase legal responsibility and mandates of forest protection force at local level;

- Carry out allocation for forest protection in long-term to organizations, households, individuals, village communities;

- Develop operational structures for enforcement of law on forest.

d) Develop plantation forests, reduce pressure on natural forests;

- e) Carry out encouragement programme for creating employments in deforested and degraded areas;

- g) Improve cultivation techniques that require less agriculture land. Research and develop intensive cultivation.

2.2. Set of measures for enhancing forest carbon stock

- a) Research, apply technologies for increasing productivity of plantation and natural forests;

- b) Carry out forest enrichment in degraded land and forest rehabilitation in natural reserves and other areas;

- c) Encourage development of forest plantation model with certification of scope in households.

2.3. General measures

- a) On organization structure of state management: Improve and unify administrative structure for forestry from central to local levels. Carry out specific delegation, decentralization of functions, tasks, mandates of forestry agencies at all levels.

- b) Develop a coordinating mechanism between state management agencies at all levels participating in REDD+, in particular the Agriculture and Rural Development, Natural Resources and Environment sectors, in the formalizing REDD+ preparations;

- c) Renovate forest management practices:

- Continue conversion of state-owned forest enterprises into companies operating under Law of Enterprises and REDD+ mechanism (can participate in exchange, trading of forest carbon credits);

- Continue to renovate special use forest, protection forest management boards with REDD+ mechanism (exchange, trading of protection forest carbon credits);

- Develop forestry production model of farmsteads, communities, collectives; continue testing and creating enabling legal framework for diffusion of forest co-management, community based forest management models, public-private cooperation model;

- d) Mobilize participation by people and local communities in planning, implementation and monitoring process of REDD+ (FPIC);

- e) Promote international cooperation in forest protection and development:

- Increase cooperation with other countries, international organizations to attract investments, seeking financial and technical supports to carry out forest protection and development;

- Continue to implement multilateral agreements on environment, international commitments related to forestry which Vietnam is a signatory.

IV. ORGANIZATION FOR IMPLEMENTATION OF REDD+ PROGRAMME

1. Establishment of Central REDD+ Programme Executive Board and Programme Office

Assign Minister of Agriculture and Rural Development:

- a) To establish Central REDD+ Programme Executive Board, which includes representatives of heads of department level under related line ministries: Agriculture and Rural Development, Government Office, Natural Resources and Environment, Planning and Investments, Finance, Sciences and Technologies, Foreign Affairs, Ethnic Committee. Leader of Ministry of Agriculture and Rural Development is Chairman of the Board;

- b) To establish REDD+ Programme Office, which is the supporting agency for the Central Executive Board in coordinating Programme activities, located inside Administration of Forestry;

- c) To issue operational regulations for Central Executive Board, Programme Office, in compliance with current legislation.

- d) To lead, cooperate with relevant line ministries, sectors, agencies, organization (including international organizations) in development and issuing regulations on governance structure of REDD+ Programme, in compliance with Vietnam legislation, international treaties and agreements related to REDD+.

2. Responsibilities of related line ministries, sectors

2.1. Ministry of Agriculture and Rural Development

- a) Be the focal agency of REDD+ Programme;
- b) Develop, approve and carry out the ministry's Action Plan on implementation of REDD+ Programme, assigning activities to direct subordinate entities according to approved plans;
- c) Develop mechanisms, policies to submit to the Prime Minister for issuing, or to issue following functions and duties assigned;
- d) Calculate necessary expenditures, compile annual budgeting plan, sending to Ministry of Planning and Investment, Ministry of Finance for compiling as regulated by Law of State Budget;
- e) Lead, cooperate with related agencies, entities to monitor and evaluate REDD+ Programme;
- g) Compile, report annual implementation results to Prime Minister, propose resolutions for problems arisen which exceed own mandates;
- h) Lead international negotiations on REDD+.

2.2. Ministry of Natural Resources and Environment

- a) Be the leading agency on climate change and the focal point for United Nations Framework Convention on Climate Change (UNFCCC) and the Clean Development Mechanism (CDM). Ministry of Natural Resources and Environment cooperates with Ministry of Agriculture and Rural Development in reporting to UNFCCC on REDD+;
- b) Bear responsibility on planning and management of forest land and integrating REDD+ into land use planning;
- c) Issue according to mandates or submit to authorized level for issuing mechanisms, policies on allocation, leasing of forest land following REDD+ mechanism;
- d) Assign related subordinate entities with cooperating with entities under Ministry of Agriculture and Rural Development in monitoring, reporting on reduced emissions in Vietnam to UNFCCC.

2.3. Ministry of Planning and Investments

Cooperate with Ministry of Agriculture and Rural Development in development of mechanisms, policies for management and implementation of REDD+ Programme.

2.4. Ministry of Finance

a) Cooperate with Ministry of Agriculture and Rural Development in development of mechanisms, policies for management and implementation of REDD+ Programme;

b) Cooperate with international entities in REDD+ related payment issues;

c) Monitor REDD+ related financial conducts.

2.5. Ministry of Information and Communication

Guide, supervise mass media agencies on communicating for awareness and responsibility raising of agencies, organizations and people in forest protection and development, REDD+ Programme implementation.

2.6. Government Office

Participate in overall checking, evaluation of REDD+ Programme.

2.7. Responsibilities of related ministries, sectors

According to functions, duties within their own state management mandates, line ministries, sectors proactively cooperate with Ministry of Agriculture and Rural Development, at the same time supervise subordinate agencies in the implementation of REDD+ Programme.

3. Responsibilities of Province People's Committees

a) Communicate, disseminate REDD+ Programme at local level

b) Establish Programme Executive Board with one leader of People's Committee as Chairman

c) Direct Department of Agriculture and Rural Development in leading and cooperating with related agencies at same level, develop and submit to Province People's Committee for approval of action plans, schemes, projects for implementation of REDD+ Programme at local

d) Proactively mobilize more resources and integrate related activities from other Programme in the area to archive Programme's objectives

e) Cooperate with related ministries, sector in supervising and checking on Programme implementation by organizations, individuals in their respective area as regulated by the Programme

g) Ensure and comply with monitoring and evaluation principles established by the programme

h) Report periodically on implementation progress of objectives, tasks of the Programme in provinces, cities according to current regulations

i) Encourage political-social, social-professional organizations, public unions,

non-governmental organizations and business to actively participate with respective functions and tasks, into programme related activities.

V. MONITORING, EVALUATION AND INFORMATION ON SAFEGUARD MEASURES

1. Programme monitoring and evaluation

a) Monitoring, supervision and recourse mechanism for REDD+ implementation must ensure transparency and wide participation from grassroot level entities and civil society.

b) MRV system is a main tool for monitoring and evaluation of REDD+ Programme.

c) Monitoring and evaluation contents:

- Implementation of land use planning and zoning; land and forest allocation, FPIC; safeguard measures;

- Demonstration activities based on performance in selected pilot provinces;

- Disbursement, payments by REDD+ Fund, benefit distribution system (BDS) and related financial transactions.

2. Establishing information system on safeguard measures

a) MRV system is the main tool for coordinating, harmonizing and compiling all data collected from national, provincial and community level related to REDD+.

b) Content:

- Provide information on implementation of "safeguard measures" according to international treaties, agreements related to REDD+;

- MRV system will connect to other information system supporting national level analysis, verification of reduced emissions and enhanced carbon stock, reporting to the agency conducting national greenhouse gas inventory;

- MRV will provide evidence so that REDD+ Fund can carry out payments to participants.

c) Ministry of Agriculture and Rural Development supervise, cooperate with other relevant bodies in establishing information system on safeguard measures within the scope of REDD+ Programme.

Article 2. The Decision shall come into force on the date of its signature.

Article 3.The Ministers, Heads of Ministerial equivalent bodies, Heads of Government's agencies , Chairmen of People's Committees of provinces and municipalities bear responsibility to implement this Decision./.

PRIME MINISTER

**ANNEX 01. LIST OF ACTIVITIES, PROJECTS ON REDD+ PROGRAMME IMPLEMENTATION IN VIETNAM
FOR THE PERIOD OF 2011-2015**

No.	Area	Specific activities	Leading Agencies	Outputs	Implemetatio n period
1	Capacity building and institutional development for management of REDD+ activities in Vietnam	1.1. Organize conferences, themed workshop, training courses on REDD+ knowledge for staff and officers of relevant sectors at central and provincial levels	Administration of Forestry (MARD); DARD in provinces with forest	Conferences, workshops, training courses on REDD+ knowledge for staff and officers of relevant sectors at central and provincial levels being held	2012-2013
		1.2. Disseminate, communicate REDD+ information to staff, officials in forestry sector and REDD+ revelant sectors at central and provincial levels	Administration of Forestry (MARD); DARD in provinces with forest	Communication and information dissemination sessions for staff and officers of relevant sectors at central and provincial levels being held	2012-2013
		1.3. Organize training courses, knowledge buidling on MRV, REL/RL establishment for related proffesional staff at central and provincial level	Administration of Forestry Forest Inventory and Planning Institute. Vietnam Institute of	Training courses on MRV for related proffesional staff at central and provincial levels conducted	2012-2013

Forestry Sciences.
International
organisations, projects

2 Complete the legal framework for REDD+ Programme	2.1. Complete the legal framework related to land and forest resources management	MONRE MARD	Legal framework related to land and forest resources management amended, revised, completed	2012-2015
	2.2. Complete the legal framework for REDD+ financial management	Ministry of Finance MARD	Legal framework for REDD+ financial management completed	2012-2015
	2.3. Complete the legal framework for REDD+ related technical management	MARD	Legal framework for REDD+ related technical management completed	2012-2015
	2.4. Complete the legal framework for enforcement of law on forestry and trade forest product	MARD Ministry of Industry and Trade Ministry of Justice	Legal framework for REDD+ related technical management completed	2012-2015

3	Establish Reference Emission Levels (RELs)/forest Reference level (RL)	3.1. Establish reference scenario for REDD+ at national/provincial level	MARD MONRE	- REDD+ Reference scenario at national level established. - REDD+ Reference scenario level established in pilot provinces
4	Establish and operationalize measurement, reporting and verification (MRV) system	4.1. Establish national/provincial MRV systems and report on activities within REDD+ mechanism	MARD MONRE	National/provincial MRV system established
		4.2. Monitor gas emissions and emission displacements in pilot provinces	National/provincial MRV system	Gas emissions and emission displacements in pilot provinces monitored
		4.3. Information report and management	National/provincial MRV system	
		4.4. Verify emission reduced, enhanced carbon stock and emission displacement in pilot provinces	National/provincial MRV system	Reduced emission, enhanced carbon stock and emission

					displacement verified
5	REDD+ Programme Financial management	5.1. Establish National REDD+ Fund	MARD		National REDD+ Fund established
		5.2. Establish Province REDD+ Funds in pilot provinces	PPC		Provincial REDD+ Funds established 2012-2013
		5.3. Establish and operationalize performance based benefit distribution system for REDD+ (BDS) in pilot provinces	PPC		Performance based benefit distribution system for REDD+ (BDS) operational in pilot provinces 2012-2015
6	Monitoring and Evaluation of REDD+ Programme	6.1. Monitor and evaluate national REDD+ programme	MARD MONRE DARD in pilot provinces		National REDD+ Programme monitored and evaluated 2012-2015
7	Establish information system on safeguard measures	7.1. Establish information system on safeguard measures	- Administration of Forestry (MARD) - MONRE - MOIT		Information system on safeguard measures established and operational 2012-2015
